

ForageKing

Sorghum X Sudangrass

BMR

1-877-560-5181
alforexseeds.com

Performance

- Warm-season, summer annual for multiple harvests as pasture, hay or silage
- Carries the brown mid-rib gene for improved forage quality, palatability and animal intake over non-BMR hybrids
- Excellent drought tolerance for low rainfall areas

Management

- Adapted to all areas of the U.S. where hybrid sorghum x sudangrass or hybrid sudangrass is grown
- Plant after the danger of frost and soil temperatures exceed 65°
- Leave a 3 to 4" stubble at harvest and apply 1 to 1.25 pounds of actual nitrogen for each day to the expected next harvest
- Follow all sorghum feeding precautions

Appearance at Harvest Maturity

- Wide, showy leaves with the characteristic brown mid-rib coloring. Usually chest-high before head extension

Seeding Rate Recommendations

- Approximately 16,000 seeds per pound
- In 6" to 18" drilled rows, seed 10 to 25 pounds per acre dryland and 15 to 40 pounds per acre irrigated
- For broadcast, seed 10 to 30 pounds per acre dryland and 20 to 40 pounds per acre irrigated
