Hi-Gest®
ALFALFA
TECHNOLOGY

Hi-Salt
SALINITY TOLERANT ALFALFA

Agronomics

Yield rating:	5 or Best
Fall dormancy class:	FD 10
Multifoliate leaf expression:	Low
FastGrowth rating:	Very Fast
Salinity tolerance:	
Germination:	Tolerant
Forage production:	Tolerant

Performance

- A high yield potential, non-dormant variety with Hi-Gest® Alfalfa Technology with improved fiber digestibility for Southwestern U.S. commercial hay growers, dairymen and exporters
- A product of conventional plant breeding and selected for high leaf-to-stem ratio**

Management

- Responds to today's recommended alfalfa best management practices for low desert production areas
- A variety that offers management flexibility through the growing season to adjust to market needs
- Stable yield performance through the season with winter productivity comparable to other non-dormant varieties
- Use accurate feed sampling procedures to measure the advantage of the Hi-Gest technology. Rations using Hi-Gest alfalfa are easily balanced by nutritionists

Appearance at Harvest Maturity

- Plants are medium-tall with a dense canopy of medium-dark green leaves and a visible high leaf-to-stem ratio
- Features broad crowns that are not typical for non-dormant varieties

Head to Head Comparison Yield in DM Tons per Acre

Competitor	Competitor	AFX 1060	Harvest Years ¹	% Yield Advantage

SW 8421S	8.76	8.75	22	0%
SW 9215	19.48	19.04	2	-2%

¹ Harvest Years = the number of years in either Public and/or Private trials where the two varieties have been in the same trial and are on harvest schedule for the yield comparisons to be listed.

Pest Package

HR R MR LR S

Diseases

Anthraxnose		●			
Aphanomyces-Race 1				●	
Bacterial wilt				●	
Fusarium wilt		●			
Phytophthora root rot		●			
Verticillium wilt		●			

Insects

Blue alfalfa aphid		●			
Cowpea aphid	●				
Pea aphid		●			
Spotted alfalfa aphid	●				

Nematode Resistance

Northern root knot	●				
Southern root knot	●				
Stem nematode	●				

Yield Rating Key: 5 = Best; 3 = Average; 1 = Poor

Agronomic Ratings are based on average performance between Alforex varieties. Actual performance may be adversely affected by extreme conditions. Unless stated, ratings are based on standardized testing procedures endorsed by the North American Alfalfa Improvement Conference.

FastGrowth Ratings are calculated by Alforex Seeds from weekly measurement of varieties grown side-by-side from green-up to harvest through the growing season. Expressed as average centimeters growth per day. >2.20 = Very Fast; >2.00 = Fast; >1.80 = Average; >1.60 = Slow; <1.60 = Very Slow

*The increased rate of fiber digestion, extent of digestion, and crude protein data was developed from replicated research and on-farm testing. During the 2015 growing season at West Salem, WI and Woodland, CA, the following commercial dormant, semi-dormant and non-dormant alfalfa varieties were compared head-to-head with Hi-Gest® alfalfa for rate of digestion, extent of digestion and percent crude protein: America's Alfalfa Brand AmeriStand 427TQ, Coplan Brands Legendairy XHD and Artesia Sunrise, Fertizona Brand Fertillac, S&W Seed Brands SW6330, SW7410 and SW 10 and W-L Brands WL 319HQ and WL 354HQ. Also during the 2015 growing season, 32 on-farm Hi-Gest hay and silage samples were submitted to Rock River Laboratory, Inc. for forage analysis. The results for rate of digestion, extent of digestion and percent crude protein were averaged and compared to the 60-day and four-year running averages for alfalfa in the Rock River database which included approximately 1,700 alfalfa hay and 3,800 silage 60-day test results and 23,000 hay and 62,000 silage test results in the four-year average.

** Improved Hi-Gest® alfalfa leafiness, as documented by Alforex Seeds replicated trials at West Salem, WI and Woodland, CA, versus the following commercial alfalfa varieties: America's Alfalfa Brand AmeriStand 427TQ, Coplan Brands Legendairy XHD and Artesia Sunrise, Fertizona Brand Fertillac, S&W Brands SW6330, SW7410 and SW 10 and W-L Brands WL 319HQ and WL 354HQ.

Pest Resistance Ratings

% Resistant Plants	Resistance Class	Class Abbreviation
0-5%	Susceptible	S
6-14%	Low Resistance	LR
15-30%	Moderate Resistance	MR
31-50%	Resistant	R
>50%	High Resistance	HR
