AFX 960 ALFALFA A patent pending variety

1-877-560-5181 alforexseeds.com

Agronomics

Yield rating:	5 or Best
Fall dormancy class:	FD 9
Multifoliate leaf expression:	Low
FastGrowth rating:	Very Fast
Salinity tolerance:	
Germination:	Tolerant
Forage production:	Tolerant

Pest Package	HR	R	MR	LR	S
Diseases					
Anthracnose	•				
Aphanomyces-Race 1				•	
Bacterial wilt				•	
Fusarium wilt	•				
Phytophthora root rot		•			
Verticillium wilt			•		
Insects					
Blue alfalfa aphid					
Cowpea aphid					
Pea aphid					
Spotted alfalfa aphid	•				
Nematode Resistance					
Northern root knot	•				
Southern root knot	•				
Stem nematode	•				

Performance

- A widely adapted, high yield potential fall dormancy 9 variety with Hi-Gest® Alfalfa Technology with improved fiber digestibility, intake and extend of digestion for livestock producers around the world
- · Consistent forage tests through the season for commercial growers and exporters
- A conventionally developed variety with stable performance from the first spring crop through the heat of summer to the last fall cut

Management

- Responds to today's recommended best alfalfa management practices for non-dormant U.S. alfalfa production areas
- · Higher forage quality from early bud stage through mid flower for management flexibility
- · No known soil type or management limitations

Appearance at Harvest Maturity

• Plants are tall, with a dense canopy of medium-green leaves spread down the stem resulting in a higher leaf-to-stem ratio** and higher crude protein when compared to other semi-dormant varieties

¹ Harvest Years = the number of years in either Public and/or Private trials where the two varieties have been in the same trial and are on harvest schedule for the yield comparisons to be listed.

Yield Rating Key: 5 = Best; 3 = Average; 1 = Poor

Agronomic Ratings are based on average performance between Alforex varieties. Actual performance may be adversely affected by extreme conditions. Unless stated, ratings are based on standardized testing procedures endorsed by the North American Alfalfa Improvement Conference.

FastGrowth Ratings are calculated by Alforex Seeds from weekly measurement of varieties grown side-by-side from green-up to harvest through the growing season. Expressed as average centimeters growth per day. >2.20 = Very Fast; >2.00 = Fast; >1.80 = Average; >1.60 = Slow; <1.60 = Very Slow

"The increased rate of fiber digestion, extent of digestion, and cude protein data was developed from replicated research and on-form testing. During the 2015 growing season at West Salem, WI and Woodland, CA, the following commercial dormant, semi-dormant and non-dormant alralia varieties were compared head-to-head with 14-Sect 3 failaf for rate of digestion and percent cude protein. America 3 Malfal8 Brand Am

Pest Resistance Ratings

% Resistant Plants	Resistance Class	Class Abbreviation
0-5%	Susceptible	S
6-14%	Low Resistance	LR
15-30%	Moderate Resistance	MR
31-50%	Resistant	R
>50%	High Resistance	HR
